## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25 and 26 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Rothfritz et al (US 6,002,482).

In the paragraph bridging columns 11 and 12, Rothfritz et al disclose a method of calibrating a fluorescence measurement as claimed.

### ***Additional Prior Art***

Cadell et al (US 6,657,717 B2) disclose a calibration device which mimics the absorbance spectrum of a body part and includes the spectral components of blood analytes.

### ***Allowable Subject Matter***

Claims 1-24, 27 and 28 are allowed over the prior art of record.

The prior art of record, taken alone or in combination, fails to disclose or render obvious (1) a spectral calibration device comprising a first/outer layer containing an optical scattering material and a second/inner layer comprising a fluorophore and (2) the method of using the calibration device to calibrate a fluorescence measurement or to correct for drift of an optical instrument.
